

Job Description - Motion Graphics Designer

Role:

- Work with basic graphics, simple animation and video footage to create content for a range of media, including mobile devices, the web and television
- Integrate a creative team, under the direction of a senior designer or art director, to help bring stories to life through video
- Intervene in various stages of the process, from conceptualizing, to storyboarding, montaging and editing, including animation and post-production work
- Willing to work to tight deadlines in a fast-paced environment.

Skills Required:

- You will have successfully completed at least introductory courses in design or animation (digital media preferred).
- You have basic knowledge of video and animation software (After Effects, Premiere Pro or Cinema 4D).
- You possess basic knowledge of other Adobe CS suite (Illustrator, Photoshop).
- You take instruction and contribute concepts and ideas in a team environment.
- You are curious, enthusiastic and hungry to learn, with an eye for design and an obsession with video storytelling.
- You prioritize tasks and are skilled at handling multiple projects at once.
- Arabic language skills are a plus.
